Subject: Follow-up questions from NBC Bay Area

Good morning,

We have received these follow-up questions from Liz Wagner. She would like to hear back from us as soon as possible today.

I will call Lily to talk about next steps.

Thanks,

Michele

Please answer/clarify the following:

- In an email below, you said the UCSC presentation had some inaccuracies. What specifically is inaccurate?
- Does the EPA agree that Superfund law requires Hunters Point must be cleaned up consistent with EPA Superfund guidance?
- The UCSC team said the Navy's cleanup has been using standards that violate this requirement and that the Navy is using standards that the EPA said should not be used. Does the EPA refute this?
- The USCS team said the EPA either didn't catch or allowed the Navy to use cleanup standards that are much more lax than what the EPA has said is protective of public health. Does the EPA refute this?
